Project Update - Design Roadmap

WORDLE

Wordle: The Game

- Game chooses a secret word
- User can guess 6 times
- Game reveals if letter is:
 - In word, wrong place - yellow
 - In word, right place - green
 - Not in word - grey

Recap of Project

Popular wordle game clone

- Extended with various features to increase replayability
 - Variable word length
 - Variable guess count
 - Variable difficulty (obscurity of secret word)
 - Timer, timed gameplay
 - Leaderboard of scores/best times

Helpful Resources So Far

- Mozilla Developer Documentation - <https://developer.mozilla.org/>

Looking Forward

- Winning screen - store win and stats in browser local storage
- Line shake upon invalid word input
- Better styling for game creation (custom dropdowns)
- Difficulty levels
 - Word lists are sorted from most frequent to least frequent
 - Difficulty choses a word from selected portion of list
- Keyboard for used characters/letters
- Potential for live competitive puzzles

Thank you!
